2,000,000,000

PEOPLE

worldwide suffer from dermatologic issues, but there's a global shortage of specialists.

Karen DeSalvo, Chief Health Officer Google 2021

By 2030, we expect a shortage of doctors in Germany of around 165,000.

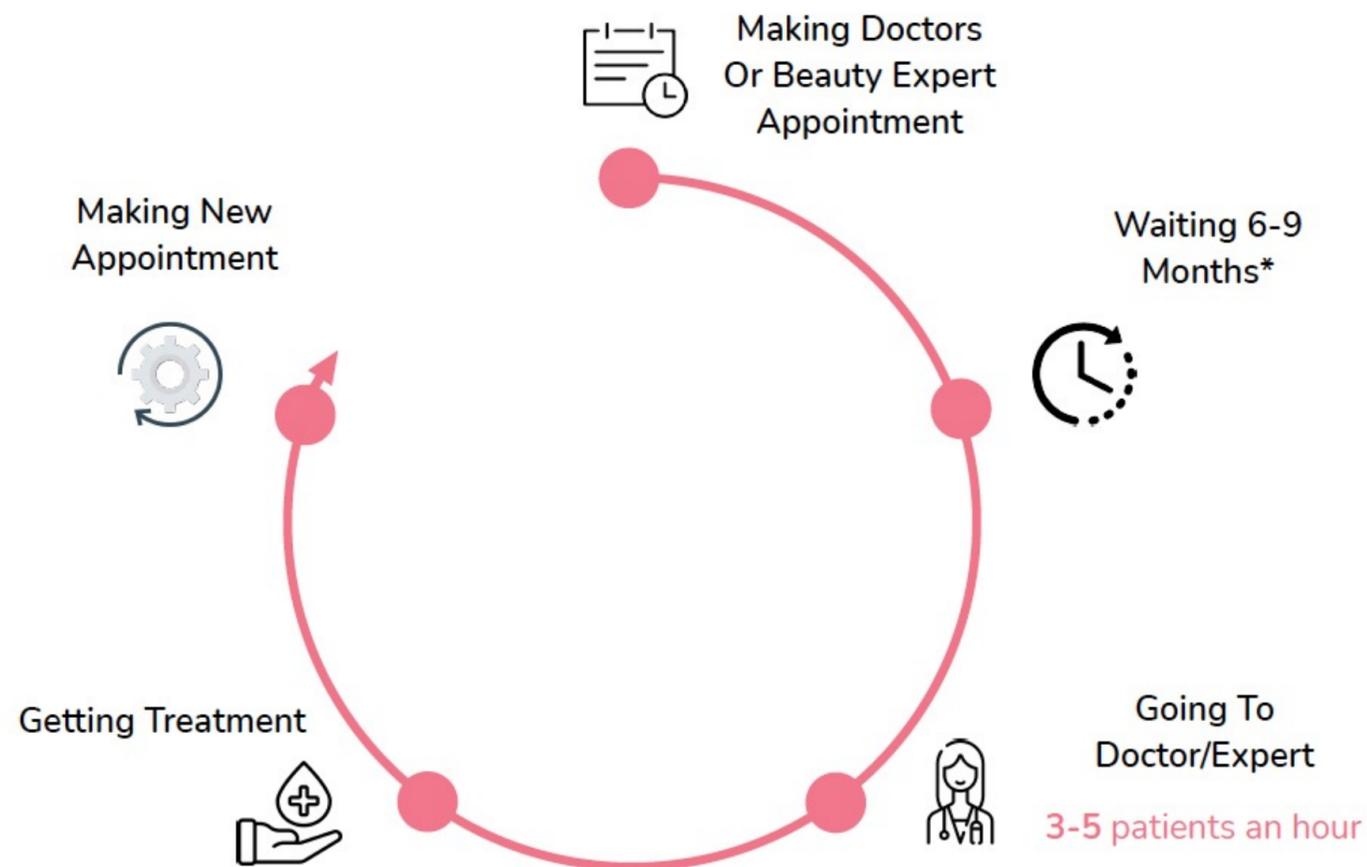

PWC

WORLDWIDE SCALABLE

# Improving (Skin) Health With AI

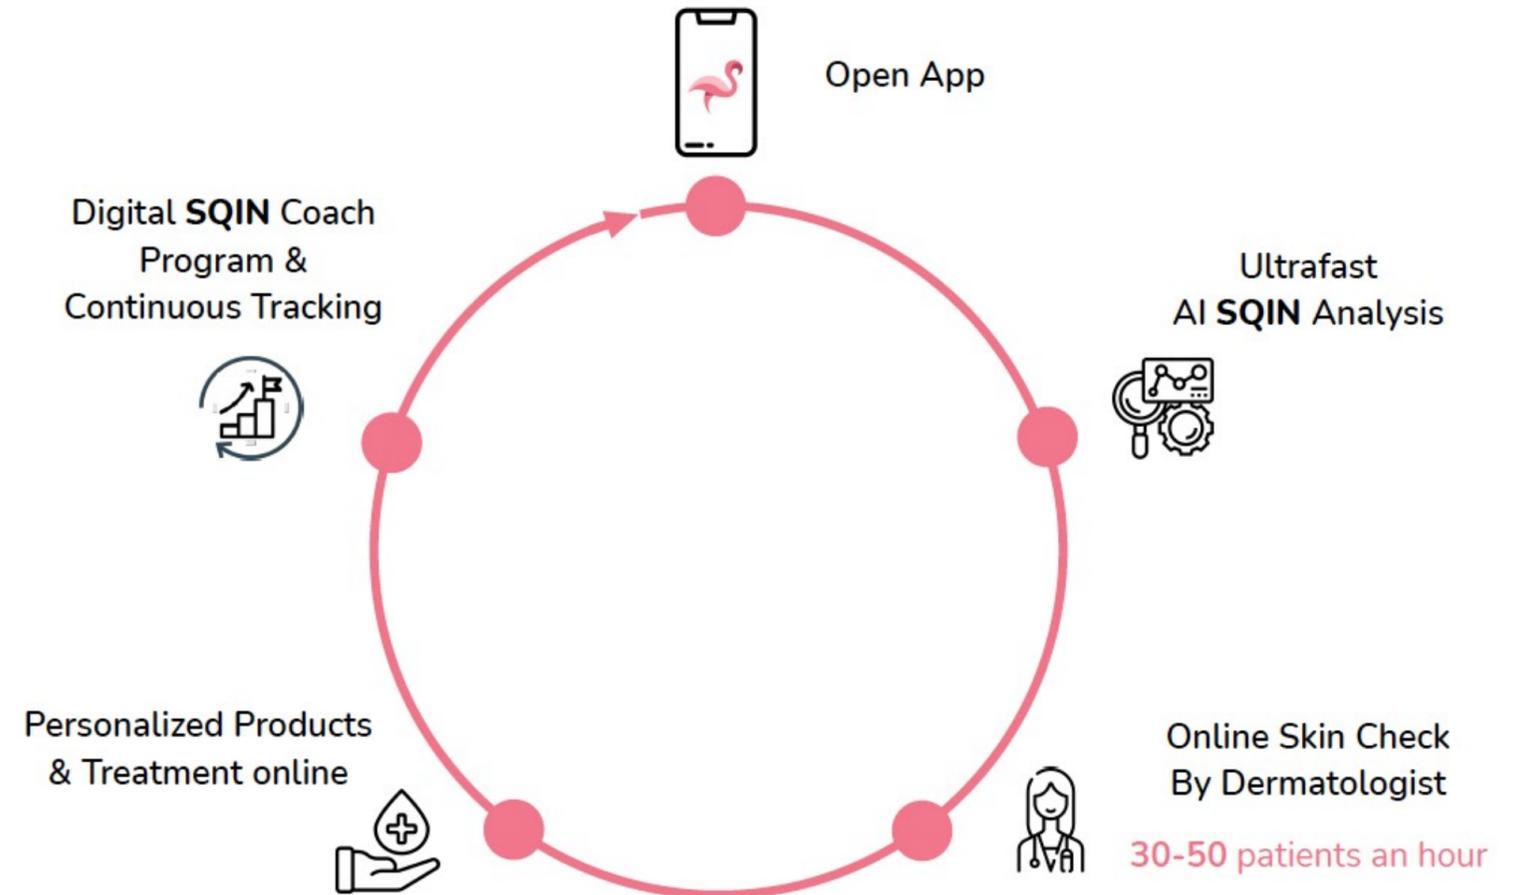

## THE CONVENTIONAL WAY

The shortage on experts and doctors causes long waiting times and poor medical after care and makes preventive application impossible.

## THE COMBINED **SQIN** WAY

RE-IMAGINE – The way the dermatology world works today will be different: fast, dramatically less time-consuming, easy help/support, works in every market.

\*example: German market
